SUBJECT INDEX

cartography 203–213

evironmental effects
  general 55–62, 63–76
education and training 47–54, 227–237
electric power
  generation, non-traditional 63–76
energy policy and planning 157–165
energy sources
  coal 47–54
  exploration 17–28
  geothermal 175–178
  natural gas 387–402
  petroleum 387–402
  reserves and resources 251–261, 387–402
  supply, demand and economics 47–54
  waste products and others 55–62
  general 251–261, 361–368

geology and geophysics 17–28

international co-operation
  cartography 215–225
  energy 47–54, 63–76, 361–368, 403–404
  minerals 81–83, 215–225, 317–336, 337–346, 403–404
  water 78–80, 93–94, 95–110, 369–376, 379–386, 403–404

mineral economics
  finance 239–250, 263–275, 277–284
  investment 263–275, 277–284
  general 39–46
mineral policy and planning 39–46, 145–155, 167–173, 239–250, 277–284, 347–358

mineral resources
  demand and supply 145–155
  exploration 17–28, 29–38, 77–78, 227–237, 317–336
  reserves and resources 7–16, 283–297, 347–358
  general 167–173, 178–180, 337–346, 347–358

ocean resources
  general 283–297

projections
  energy 157–165, 251–261

remote sensing 215–225

terminology 7–16, 387–402

water resources demand, use and efficiency
  agriculture 111–118
  community water supplies and sanitation 95–110
water resources management of hazards
  flood control 183–185
water resources planning, development and management
  development 369–376
  institutional aspects 131–143
  policy and planning 111–118, 119–129, 131–143, 180–183
  transfer of water technology and knowledge 119–129
  general 95–110
